

Design meets environment

White bevel

Urban Style

Unique

In Unique we have developed a ceiling tile that sets an entirely new standard in terms of your design: Uniqueness. No two tiles are the same.

Unique is a low-emission wet-felt mineral tile, which makes a unique visual impact as a result of its natural qualities. With its stone-grey surface it boasts a successful classic design, not least because of its concealed substructure. Unique is 100 % recyclable.

Raw bevel

Setting trends with sustainably produced materials and at the same time meeting the highest design standards – we take into account the architects' requirements right from the product development stage. Recyclability and natural looks, achieved by doing without a finishing or final treatment, are the features that make Unique stand out as the alternative to every other ceiling tile.

Do you have any questions about the natural materials that we use, which contribute to the protection of the environment and from which we manufacture products boasting aesthetics in their purest form?

Technical data

Unique | Harmony

Material	Mineral tile
Reaction to fire	A2-s1,d0 according to EN 13501-1
Colour*	Stone grey, similar to RAL 7030, surface colour is varied
Thickness	15 mm nom. and 20 mm nom. (dependent on system)
Sound reduction°	25 dB, CAC 25 dB (S 19) 37 dB, CAC 37 dB (S 1, S 9a)
Sound absorption	 $\alpha_w = 0.65/NRC = 0.70$
Humidity resistance	 up to 90 % RH

* Irregular appearance, material and colour differences in the tile surfaces and the tile bevels are intentional. The white bevel tiles may have some minimal gradients in the tile surfaces. This is a part of the natural aesthetics of the design and is not grounds for a complaint. Before laying the panels care should be taken to install panels from as many different packages as possible to ensure thorough mixing of the panel surface. If necessary, the ceiling picture with the customer and/or planner vote.

° Dependent on system, soffit and other project specific factors
