Natura A | n0WAcoustic

NEW INSERT OPTION - WITH 90% ABSORPTION

Natura A is the acoustically optimised insert version of the Natura hemp straw tiles and, as a class A absorber, achieves a noticeably higher level of sound absorption. Natura A thus expands the product range to include a high-performance solution for the most demanding acoustic requirements when used as a closed suspended ceiling.

Natura hemp straw tiles impress with their natural materiality, their positive contribution to the ecological balance and their versatile applications. They are vapour-permeable and thus contribute to a comfortable and healthy indoor climate.

Thanks to the resource-efficient manufacturing process, hemp becomes a zero-waste resource. Natura A fits perfectly into the S 3 system with two sizes and the N0 edge.

A wide range of colours offers great design flexibility. Natura hemp straw panels are ideal for bespoke interior designs and create a pleasantly contemporary look.

Structure

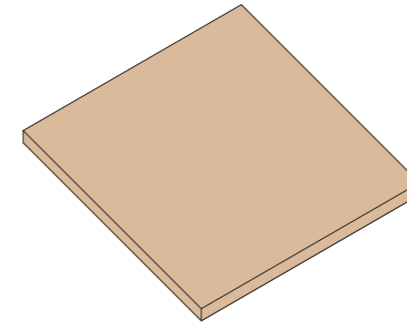

The surface of the Natura hemp straw tiles has a compressed, natural structure that is created by the special processing of the hemp material. This distinctive product will add warmth and texture to any interior.

Natura A | nOWAcoustic
Hemp straw tile R2 | 600 x 1200 x 30 mm

Edge details

Natura A is available in edge finish N0 for the S 3 lay-in system. This variant is precisely machined and complements the natural structure of the product.

Natura A | nOWAcoustic
Hemp straw tile
S2 | 600 x 600 x 30 mm
Edge N0

Colours

Natura A is available in several natural colour shades – from warm earthy tones to grey variants and soft moss and clay shades. This natural colour palette creates a calm, harmonious atmosphere in the room.

Granit Cobalt Moss Clay Rust

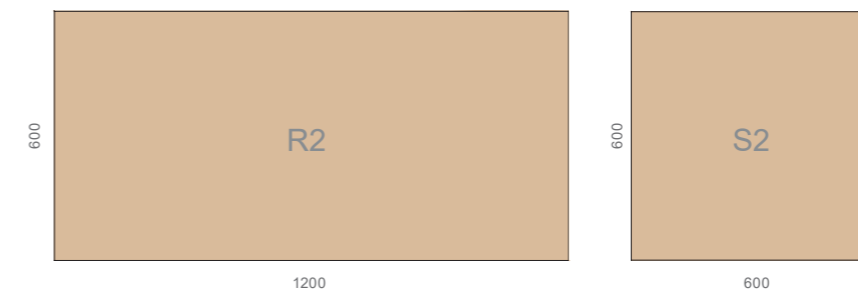

Pure (uncoated) Ice Sage Sand Copper

Due to the natural material, colour variations are possible.

Formats

Natura A is available in two formats: R (rectangular), S (square). The two available sizes allow for a clean, uncluttered ceiling design with a harmonious overall appearance. Both variants offer flexible installation options and are ideal for creating high-quality ceiling surfaces.

Available sizes:
R2: 600 x 1200 x 30 mm S2: 600 x 600 x 30 mm

Technical data at a glance

Material	Hemp straw / mineral binder / acoustic fleece
Reaction to fire	B-s1,d0
Sound absorption	$\alpha_w = 0.90$ NRC = 0.90
Edge Substrate	Edge N0 System S 3
Thickness	30 mm
Weight	approx. 11.11 kg/m ²
Humidity resistance	up to 70% RH
Proportion of renewable raw materials	60%
Recyclability	100%
CO ₂ emissions (A1-A3)	-1,34 kg CO ₂ emissions eq. per m ²
Formaldehyde emissions	< 5 µg/m ³

ORDERING GUIDE

Your personal OWA number is created by combining the format, edge and colour. This number serves as the basis for your order with Customer Service and leads directly to the appropriate item number – including OWA packaging unit and delivery details. You will find a complete overview of all item numbers on the following pages.

Example

Selection criterion	Example value	OWA-NUMBER
Format	S2	Natura A S2-N0-Moss
Edge	N0	
Colour	Moss	

Would you like to place an order or do you have any questions about your OWA number? Our customer service team looks forward to hearing from you and will be happy to assist you.
